

Sprinkler Contractors

The requirements for persons, who work on, test, maintain, and inspect sprinkler systems in the state of Georgia may be found in Title 25, Chapter 11 of the Official Code of Georgia Annotated.

For Sprinkler contractors who plan to install a new system or perform extensive work to an existing system, a detailed sprinkler plan submittal checklist is required to be filled out and submitted upon plan submittal. Minor repairs or adjustments are required to be reported to the Inspections Division. We will keep current on product liability issues and report faulty or defective products that cause fires to the Consumer Protection Agency.
